EDUCATION

Bachelor's Degree in Progress, Honors | Kennesaw State University

2025 - Present

- Computing and software interests; active in research, student government, technology advising, and student organizations.

EXPERIENCE & RESEARCH

Undergraduate Researcher | Kennesaw State University - VIP, FYSP, and IMPACT

Aug 2025 - Present

- Study emotional-context AI, adaptive agent behavior, responsible implementation, and small-device deployment.
- Compare classical and quantum-oriented phishing-detection approaches; prepare survey data and assessment benchmarks.

Founder & Product Lead | StuddyBuddy

Dec 2025 - Present

- Shape an iOS study-partner product around course-based discovery, shared preferences, communication, safety, and carefully scoped AI study support.

Senator, CCSE & IT Advisory Representative | KSU Student Government Association

Nov 2025 - Present

- Represent computing students, gather feedback, and bring student priorities into academic, campus, and technology-planning conversations.

Founder & CEO | QuantumRise Foundation

Nov 2025 - Present

- Lead an emerging-technology access initiative; built its web presence and explore education programs, equipment-access concepts, and partnerships.

Intern | System Technology Works LLC

Oct 2025 - Present

- Experiment with local language-model tooling, machine learning, mechatronics, and applied AI for mechanical systems.

LEADERSHIP & ACTIVITIES

Secretary, Kennesaw Indian Students Organization - documentation, communications, scheduling, and event logistics. **Apprentice Marketing Officer, ASME** - promotional design, content scheduling, and outreach. **Junior Analyst, Student Managed Investment Fund** - equity research, valuation context, market monitoring, and research pitches.

SELECTED PROJECTS

Zargon - research surface for bounded software-agent workflows and cross-device coordination.

Stock Predictor - Python and machine-learning experiment for multi-signal market analysis and model comparison.

FHS Checklist - sanitized workflow case study focused on task state, handoffs, and repeatable operations.

SKILLS & CREDENTIALS

Technical: Python, Java, JavaScript, HTML/CSS, SQL, React, Astro, Linux, Kubernetes, Raspberry Pi, MATLAB, data analysis, machine learning, AI/LLMs, quantum computing, iOS and product design.

Credentials: IBM AI, Data, and Cybersecurity Fundamentals; Databricks Generative AI Fundamentals; MathWorks MATLAB.
